Crosswalk enhancements in
Jersey City, NJ

CALLING ALL COMMUNITY MEMBERS

We need community members to re-imagine what short term safety changes they are interested in trying out along the Freer, Railroad, McKinley and Dewey corridor as part of the Chelsea Pop Project.

Public Engagement will take place the week of July 6-10. Check the project website at miwats.org/chelseapop for all project updates and events.

Pop-Up Project: A short-term street design project that is community-led, evaluated and permitted by city agencies, rooted in city goals, and in accordance with local, state, and national street design guidelines.

The images below provide a sample of what other communities have done to re-imagine spaces around their community.

Enhanced Crosswalk

Painted Bike Lane with Buffers from parked cars and travel lanes

Crossing Treatments

Sharrow with Painted Area

Wayfinding Signs
