FOR IMMEDIATE RELEASE

Chelsea Pop Project Extended to October 9

The Chelsea Pop project team is excited to announce that the project will be extended until October 9! The project is being extended by 2 weeks due to the Freer Rd. bike lanes being put in place during the week of September 18.

Suzann Flowers, Transportation Planner with the Washtenaw Area Transportation Study, “expressed how exciting it is to see all the project elements on the ground. We want to extend a big thank you to the Chelsea Department of Public Works team for their hard work and assistance with the deployment of the various project elements.”

A final project survey will be released the week of September 28, to gauge the impression of the Chelsea Pop project.

The Chelsea Pop project is a 30-day demonstration project that will be deployed in the month of September along Freer Rd., Railroad St., McKinley St. and Dewey St. Project partners include the City of Chelsea, Washtenaw Area Transportation Study (WATS) and Saint Joseph Mercy Health System. More information can be found at the project website at miwats.org/chelseapop.
